

The X-Ray's Picture of Health

He is well past the dangerous age of forty, yet the X-ray's searching eye shows his teeth and gums to be in perfect health.

All through his life he has cared well for his teeth, gone regularly to his dentist, and health is his reward.

Four people out of five, at this man's age, are afflicted with Pyorrhea. Thousands younger also suffer from this disease.

If neglected, Pyorrhea plays havoc with the mouth. It attacks the gums, loosens the teeth until they drop out or must be pulled.

Fortunately, Nature gives ample warning of Pyorrhea's coming.

Tender gums that bleed easily when brushed are the danger sign.

Heed this signal, and your teeth are still safe. Neglect it, and you may pay the severest penalty.

At the first hint of Pyorrhea's presence, go to your dentist for thorough inspection of your teeth and gums. Then buy a tube of Forhan's For the Gums and use it regularly.

Forhan's For the Gums is the formula of R. J. Forhan, D. D. S., who has specialized on the treatment of Pyorrhea. If used consistently and used in time it will prevent Pyorrhea or check it in its course.

Used as a dentifrice, it not only keeps the teeth clean and white, but wards off Pyorrhea by keeping the gums in the pink of perfect health.

Brush Your Teeth With Forhan's—How to Use It

Use it twice daily, year in and year out. Wet your brush in cold water, place a half-inch of the refreshing, healing paste on it, then brush your teeth up and down. Use a rolling motion to clean the crevices. Brush the grinding and back surfaces of the teeth. Massage your gums with your Forhan-coated brush—gently at first until the gums harden, then more vigorously. If the gums are very tender, massage with the finger, instead of the brush. If gum-shrinkage has already set in, use Forhan's according to directions, and consult a dentist immediately for special treatment. 35c and 60c, in the U. S. and Canada. At all druggists.
